Portfolio page: toluagboola.github.io

Skills

HTML
CSS (SCSS)
Git
React
NodeJS
JavaScript (ES6)
TypeScript
Great communication and interpersonal skills.

Experience

Frontend Developer

Nubiaville Ltd., September 2021 - August 2022

I was responsible for using HTML, CSS and JavaScript to develop clean and user-friendly business solutions on the SharePoint platform. I built automated flows using Power Automate to reduce the time spent on repetitive tasks. I was responsible for project management, ensuring that all code was properly written, tested and documented. I liaised with the company's clients to receive their input before, during and after the execution of their requirements. I also conducted end-to-end testing of all the developed applications with my teammates to ensure that high quality work was being delivered to our clients.

JavaScript Developer

Your Internet Pages (YipOnline), February 2021 - May 2021

I was responsible for implementing the front-end logic that defines the behavior of the visual elements of the company's web application. I was also responsible for connecting this with the services that reside on the back-end.

Projects

Sella Dashboard

Built with React and TailwindCSS

A fully responsive e-commerce vendor dashboard that allows the user to view their sales overview, notifications, products, customers, orders, and transaction history. Users can also add new products with images, view

the details of individual products, switch between light and dark mode, and change the theme color.

Hacker Stories

Built with React and TypeScript

An application that allows the user to search for articles posted on Hacker News.

Todo List App

Built with Node.js, Express and MySQL

A sortable todo list application that can add, mark as done and delete tasks.

Game of Life

Built with React and TypeScript

A cellular automation, zero-player game devised by John Conway whose evolution is determined by its initial state.

Stellar Photos Website

Built with HTML and SCSS

The landing page for Stellar Photos, a browser extension.

Education

University of Ilorin - B.Sc Microbiology

FreeCodeCamp - Responsive Web Design Certification

Interests

I am passionate about tech, web development and programming. I also have a keen interest in music, health and fitness, literature, art and drama. I love singing, dancing, traveling to new places, meeting new people and listening to people's contributions.

Languages

English, Yoruba and a little French.
